Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS,
WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
 - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
 - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) Responsive to communication(s) filed on 31 January 2006.
- 2a) This action is FINAL. 2b) This action is non-final.
- 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Response to Arguments

a. Applicant argues on page 6, second paragraph that Wood does not specifically disclose 'storing means for storing user information which includes user preferences with the state data of the content collected from a hard-disk recorder in a customer database.'

Wood discloses storing means (104) for storing user information which includes user preferences with the state data of the content collected from a hard-disk recorder in a customer database (fig. 4, el. 403; [0042-0044]; [0049-0050]).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

1. Claim(s) 1-3 is/are rejected under 35 U.S.C. 102(e) as being anticipated by Wood (2001/0043795).

As to claim 1, Wood discloses:

A content-exhibition control apparatus for exhibiting a content in another apparatus (figs. 8 and 9; [0049]; [0050]),

Art Unit: 2623

comprising: generating means for generating degree-of-exposure control data used to control the degree of exposure of the content; exhibition control means for controlling the exhibition of the content recorded in the another apparatus according to the degree-of-exposure control data generated by the generating means; (by clicking a name in the channel guide, a dot is placed on the screen and the program is recorded, thereby controlling the 'degree-of-exposure' [0049]; fig. 8; by specifying all shows in a series to be recorded, a double dot is displayed and also controls the 'degree-of-exposure'; fig. 9; [0050]);

obtaining means for obtaining the state data of the content sent from the another apparatus (the "state data" is reflective of whether a single program or all shows in a series are recorded; figs. 8 and 9; [0049]; [0050]),

wherein the generating means generates the degree-of exposure control data according to the state data of the content, obtained by the obtaining means (the 'degree-of-exposure' is dependent on the number of dots displayed, which is displayed according the 'state data' or whether the show or series is to be recorded figs. 8 and 9; [0049]; [0050]);

storing means (104) for storing user information which includes user preferences with the state data (a user criteria indicates whether a single program or all shows in a series are recorded, wherein the user criteria of preferences is stored) the content collected from a hard-disk recorder in a customer database (fig. 4, el. 403; [0042-0044]; [0049-0050]).

As to claim 2,

the degree-of-exposure control data includes a content ID (name of the program; figs. 8 and 9; [0049]; [0050]),

an exposure type (recorded or not recorded figs. 8 and 9; [0049]; [0050]),

and an exposure value (single or double dot figs. 8 and 9; [0049]; [0050]);

and the state data of the content includes a viewing condition and a degree-of-exposure condition (the 'viewing condition' is whether the program will be recorded and available for future viewing; the display of dots figs. 8 and 9 is the 'degree-of-exposure' of the 'state data,' or whether or not the program will be/has been recorded; [0049]; [0050]).

As to claim 3,

(the limitations are included and met as previously discussed in claim 1).

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not

Art Unit: 2623

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
